Weslley Richard

Backend Software Engineer • PHP / Laravel / Symfony — Tbilisi, Georgia (UTC+4)

Profile

I'm a Software Engineer focused on solutions that go beyond code to address real business needs. My experience spans agile startups and enterprise environments. I specialize in architecting scalable microservices with PHP (Laravel, Symfony), AWS, and Docker, and I actively mentor teams so projects move seamlessly from concept to execution.

Experience

PHP Backend Software Engineer at Printi (Apr 2023 — Jul 2025) • Full-time

Built scalable microservices with Symfony and AWS (SNS, SQS, Lambda); coordinated sprints and mentored developers, working with teams across India and Romania.

PHP Backend Software Engineer at Brasil TecPar (Datum TI) (Sep 2022 — Apr 2023) • Full-time

Maintained critical integrations with Symfony, Oracle DB and RabbitMQ; expanded the platform for third-party integrations.

Full Stack Software Engineer at Cloudfox (Apr 2021 — Jun 2022) • Contract

Co-developed an anti-fraud system that cut fraud and chargebacks by ~60%; built a real-time decision dashboard with Alpine.js.

Full Stack Software Engineer at KBR TEC (Oct 2019 — Mar 2021) • Internship

Built scheduling tools and internal management systems that centralized project tracking; delivered backends for client sites.

Education

ETEC Adolpho Berezin (Centro Paula Souza) — Computer Technician — Jul 2011 — Dec 2012

Technical Stack

Backend: PHP (Laravel, Symfony), Doctrine ORM, REST APIs, microservices, Node.js, Go, Python

Frontend: JavaScript (React, Vue, Alpine.js, Next.js), Tailwind CSS

Cloud & Infrastructure: AWS (SNS, SQS, EC2, Lambda, S3), Docker, Docker Compose

Messaging & Queuing: RabbitMQ, Kafka

Databases: MySQL, PostgreSQL, Oracle DB, MongoDB, Redis

Integrations: CRM (HubSpot), Payment (PagSeguro, Stripe, Adyen, Asaas)

Quality & DevOps: PHPUnit, SonarQube, Jenkins, CI/CD, SOLID principles
